► Determine One of Two Plastic Types

Linear Low Density Bags (LLD)

These liners are very strong and more resistant to tearing, but handle lower load capacities than HD liners.

Suggested LLD applications:

- Sticks, rough yard trimmings, glass
- Metal with sharp edges
- Plastic eating utensils, food with rough edges

Hi Density Bags (HD)

Used for: **Paper and non-rough objects**

These liners are very strong and handle higher load capacities than LLD liners, but are less resistant to tear once punctured.

Suggested HD applications:

- Paper plate, paper cups, paper towels, office paper
- Grass, rags, smooth heavy objects
- Cans without sharp edges, food without sharp edges
