

Staphicide

Surface Spray

This product is a high fragrance, non-acid disinfectant cleaner designed specifically for general cleaning and disinfecting of virtually all washable surfaces. It is formulated to disinfect inanimate hard surfaces with wide spectrum efficacy. This product deodorizes those areas which generally are hard to keep fresh. Efficacious against TB (*Mycobacterium tuberculosis*), HIV-1 (Aids) virus, and Norovirus, this product is designed specifically as a general non-acid cleaner and disinfectant for use in homes, hospitals, nursing homes, schools, hotels, and restaurants and authorized by USDA for use in federally inspected meat and poultry processing plants. In addition, this product deodorizes those areas which generally are hard to keep smelling fresh, such as garbage storage areas, empty garbage bins and cans, basements, restrooms, and other areas which are prone to odors caused by microorganisms.

DIRECTIONS

Read entire container label before using this product.

Disinfection, deodorizing and cleaning:

- Remove gross filth before application.
- Hold 6 to 8 inches from surface to be treated.
- Spray area until it is covered with solution.
- Let stand for 10 minutes.
- Wipe off with a clean cloth, mop, or sponge.

To control mold and mildew:

- Spray surface to be treated.
- Let air dry.
- Repeat weekly or if mildew reappears.
